

## Senior Structural Steel Estimator / Project Manager

- Long established family business with an excellent reputation
- Self-managed, autonomous position
- Support on larger projects

Our client is a family owned company that has gained an enviable reputation for specialist fabrication expertise.

Their growing list of clients across the mining, mineral processing, oil & gas and heavy manufacturing industries is testament to their focus on quality, precision and safety.

Due to the impending retirement of one of their long serving staff, the company seeks to employ a **Senior Structural Steel Estimator / Project Manager**.

As the successful candidate you will work on large and interesting projects incorporating structural steelwork, conveyors, trestles, motor bases, take-up towers, semi-mechanical and general steel fabrication. You will receive exposure to major construction companies and clients on account of the project management aspect of the role.

This is an ideal role for an experienced structural steel estimator looking to progress into a self-managed, autonomous position, with high job satisfaction.

An attractive remuneration package is available to the successful candidate. To ensure your success, a comprehensive induction / handover will be provided.

This company believes that their people are the key to their success – and that their well-being and job satisfaction is of paramount importance.

### **Key selection criteria:**

- Minimum 4 years structural steel estimating experience
- Trade background highly regarded
- Commitment to providing clients with service and quality
